Otelcilik

Since the beginning our principle as **Perspektif Yapı** has been customer satisfaction with concentration on quality in all the projects we have undertaken. We continue operating in line with our principles to be innovative, reliable, adaptable and successful in order to make this policy sustainable. With a portfolio that includes residences-homes, offices, hotels, malls, schools, culture centers, dormitories and industrial facility buildings, we have completed projects with over 2,500,000 m² of construction area. Equipped with this experience we build our design concepts on time using modern technology within contract terms and in accordance with relevant laws and professional rules.

We apply our professional and proactive approach with the knowledge and experience we have gained in large scale, high brand value and good quality projects to the boutique projects in the Bağdat Caddesi area through our group company **Perspektif Konut**. In this context we have brought luxury home projects to life as an investor in the prestigious and respectable districts of Istanbul's Asian side such as Erenköy and Fenerbahçe.

With **Perspektif Otelcilik** we expanded our field of operations in the sector by capitalizing on our real estate development vision in addition to our investor approach.

As the **Perspektif Group** we aim to increase our experience and knowledge by undertaking projects abroad.

- We as the Perspektif Group of Companies are committed to providing good quality products and services with a customer oriented approach complying exactly with the product/service specifications of our customers in a manner that is sensitive to the community and the environment as a company that is always open to development.
- In every step that the Perspektif Group of Companies takes and in all our operations we have adopted an environmental policy that prioritizes having the least impact on the environment and keeping pollution to a minimum, complying with the existing regulations and laws, using environmentally friendly materials and technology as much as possible in the framework of our budgets, protecting the environment in every new project and striving for constant improvement in preventing pollution to leave future generations an environment that provides a better quality of living.
- While building construction projects the Perspektif Group of Companies provide employees with healthy working conditions. We aim to implement the technologies and methods that keep occupational health and safety at the optimum level in compliance with occupational health and safety regulations by exercising the necessary caution and not avoiding any attention to detail to prevent and eliminate work accidents and any risks to human health.
- We strive to constantly develop our HSE (Health-Safety-Environment) system.
- By minimizing resource use we preserve natural resources and are sensitive to nature and the environment.
